

Access to Value-Added Patent Information via STN International

**Gerd Tittlbach
FIZ Karlsruhe**

Abstract:

The presentation gives an overview over the online patent information services offered via STN International. Value-added services are provided by

- ◆ the comprehensive content of leading international, regional, and national patent databases for all types of patent searching
- ◆ user-friendly and sophisticated retrieval functionalities and software tools
- ◆ the interfaces STN EXPRESS with Discover, STN Easy and STN on the Web for information professionals and end-users, combining the power of STN with the convenience of the web
- ◆ direct access to the fulltext by seamless connection of the databases content to the archives of publishers and patent fulltext providers
- ◆ security of the internet connections
