Examination of CII and Business Methods Applications

Madrid

November 2006

Joerg Machek, Ph.D.,
Director 2.2.21

Claim Example

Cluster
“Computers“

Requirements
of the EPC

Technicality

EPO Practice

Statistics

**A method of promoting toy sales,
comprising the step of
placing the toys on the lower shelves of
the store,
where they are easily accessible for
children.**

- classified in IPC class G06Q (was G06F17/60)
- ~ 80000 published applications

Claim Example

Cluster
“Computers”

Requirements
of the EPC

Technicality

EPO Practice

Statistics

A method for employing a training script comprising the steps of

- receiving a training script;**
- detecting a characteristic of a workout;**
- and**
- displaying activity information designated by the training script in response to detecting the characteristic.**

- classified in IPC class G09B
- ~ 54.000 published applications

Requirements for patentability

Cluster
“Computers“

Requirements
of the EPC

Technicality

EPO Practice

Statistics

Art. 52(1) EPC

European patents shall be granted for **inventions** which

- are **new**,
- involve **an inventive step** and
- are susceptible of **industrial application**.

What is excluded from patentability?

Cluster
“Computers”

Requirements
of the EPC

Technicality

EPO Practice

Statistics

Article 52(2) :

The following in particular shall not be regarded as inventions

- a) discoveries, scientific theories and mathematical methods
- b) aesthetic creations
- c) schemes, rules and **methods for** performing mental acts, playing games or **doing business**, and **programs for computers**;
- d) presentation of information

...as long as
claimed as such
Article 52(3)

What is an invention?

Cluster
“Computers“

Requirements
of the EPC

Technicality

EPO Practice

Statistics

Art.52(1) EPC *"there must be an invention"*

(Guidelines C-IV, 1.1(i)) ☆ "hidden" requirement = **"INVENTION"**

Art.52(2) EPC : *non-exhaustive list of "non-inventions"* or
potential EXCLUSIONS

Art.52(3) EPC: The items in the list of Art.52(2) EPC become
exclusions only when they are claimed **AS SUCH**

☆ **IMPORTANT:** assessment of whether the claimed subject-matter represents an **INVENTION** or an **EXCLUSION** **without regard to prior art.**

☆ **The claim is considered as a whole**

What is an invention?

Cluster
“Computers“

Requirements
of the EPC

Technicality

EPO Practice

Statistics

- Having **technical character** is an implicit requirement of the EPC to be met by an invention in order to be an invention within the meaning of Article 52(1) EPC.

T 931/95 - Pension benefit scheme

- A method involving **technical means** is an invention within the meaning of Article 52(1) EPC.

T 0258/03 - HITACHI Headnote I.

Technicality

Cluster
“Computers“

Requirements
of the EPC

Technicality

EPO Practice

Statistics

What is technical?

No definition of the word „technical“ is contained in the European Patent Convention (EPC).

Definition of German Federal Court of Justice

Cluster
“Computers“

Requirements
of the EPC

Technicality

EPO Practice

Statistics

„A teaching for a systematic proceeding by application of controllable natural forces to achieve a causal perceivable result, which is the immediate consequence of the controllable natural forces without an intermediate step of the human intellect.“

Antiblockiersystem: GRUR 1980, 802

Definition of German Federal Court of Justice

revisited

„A process that involves – prior to the physical production – an intermediate step performed substantially with the aid of computers cannot be excluded from patentability on the grounds that it refrains from making direct use of controllable forces of nature if the solution seeks to promote the possibility of manufacturing technically workable products in a different manner by technical knowledge.“

Logikverifikation: BGH ref X ZB 11/98

Technicality

EPO Practice

Statistics

EPO Approach

Cluster
“Computers”

Requirements
of the EPC

Technicality

EPO Practice

Statistics

Rather than attempting a general definition of technical“, the Board’s present approach is to stake out, through a series of individual decisions, the grey area requiring interpretation.

Technicality

Cluster
“Computers”

Requirements
of the EPC

Technicality

EPO Practice

Statistics

Technical is...

- processing **physical data**
parameters or control values of an industrial process
- processing which **affects the way a computer operates**
 - ✓ saving memory, increasing speed
 - ✓ security of a process, rate of data transfer etc.
- technical character may be implied by the **physical features of an entity**
 - ✓ memory, port etc.

Technicality

Cluster
“Computers“

Requirements
of the EPC

Technicality

EPO Practice

Statistics

- **Features relating to non-inventions within the meaning of Art. 52 (2) EPC are **non technical features**, e.g.**
 - selling, trading, insurance
 - choosing amongst candidates for a job
 - order placement and management

EPO procedure

Cluster
“Computers“

Requirements
of the EPC

Technicality

EPO Practice

Statistics

The examining division is responsible for the examination of European patent applications. (Article 18(1) EPC).

=> proceedings *ex parte*

EPO procedure

Cluster
“Computers”

Requirements
of the EPC

Technicality

EPO Practice

Statistics

An Opposition Division shall be responsible for the examination of oppositions against any European patent (Article 19(1) EPC).

=> proceedings *inter partes*

EPO Practice

Cluster
“Computers“

Requirements
of the EPC

Technicality

EPO Practice

Statistics

1. If the subject matter of the claims does **not** comprise a **technical character**

object under Article 52(2) and (3)

[possible 'no search'; double-check description]

EPO Practice

Cluster
"Computers"

Requirements
of the EPC

Technicality

EPO Practice

Statistics

"No Search" Statement :

The claims relate to subject matter excluded from patentability under Art. 52(2) and (3) EPC.

Given that the claims are formulated in terms of such subject matter or merely specify commonplace features relating to its technological implementation, **the search examiner could not establish any technical problem which might potentially have required an inventive step to overcome.**

Hence it was not possible to carry out a meaningful search into the state of the art (Rule 45 EPC). See also Guidelines Part B Chapter VIII, 1-3.

5/2002

MITTEILUNGEN DES EURO- PÄISCHEN PATENTAMTS

**Mitteilung des Europäischen
Patentamts vom
26. März 2002 über Geschäfts-
methoden¹**

PCT

In den letzten Monaten hat sich gezeigt, daß immer mehr internationale Anmeldungen, für die das EPA als Internationale Recherchenbehörde und mit der internationalen vorläufigen Prüfung beauftragte Behörde tätig werden soll, im wesentlichen auf Geschäftsmethoden² und allgemein bekannte Merkmale gerichtet sind, die sich auf deren technische Umsetzung beziehen.

INFORMATION FROM THE EUROPEAN PATENT OFFICE

**Notice from the European
Patent Office dated
26 March 2002 concerning
business methods¹**

PCT

It has become apparent in recent months that an ever increasing number of international applications for which the EPO is to act as International Searching Authority and International Preliminary Examining Authority relate primarily to methods of doing business² and commonplace features relating to their technological implementation.

COMMUNICATIONS DE L'OFFICE EUROPEEN DES BREVETS

**Communiqué de l'Office
européen des brevets, en date
du 26 mars 2002, concernant
les méthodes dans le domaine
des activités économiques¹**

PCT

Il a été constaté ces derniers mois qu'un nombre sans cesse croissant de demandes internationales pour lesquelles l'OEB fait office d'administration chargée de la recherche internationale et d'administration chargée de l'examen préliminaire international avaient trait essentiellement à des méthodes dans le domaine des activités économiques² et à des caractéristiques banales relatives à la mise en oeuvre technique de ces méthodes.

EPO Practice

Cluster
“Computers”

Requirements
of the EPC

Technicality

EPO Practice

Statistics

Example:

A method for evaluating leadership effectiveness, comprising the steps of:

- **gathering target information quantifying at least one domain selected from the group consisting of having personal convictions, being visionary, building emotional bonds, being inspirational, being team oriented, being a risk taker and having a drive to excel;**
- **comparing the target information with a standard, the standard including standard values of the domain; and**
- **identifying non-standard responses of the target.**

EPO Practice

Cluster
“Computers”

Requirements
of the EPC

Technicality

EPO Practice

Statistics

2. If there is a mix of **non-technical** and **technical** features:

**"requirement
specification"**

**prior art in
a field of
technology**

= instructions given to the programmer summarising the requirements of the customer
e.g. a business or administrative process to be automated

- skilled person is aware of it
- normally found in description & (in summarised form) in claims

Does the claim comprise:

A feature or group of features that, considered **independently from the group of remaining features of the claim, define subject-matter **excluded from patentability** under Article 52(2) and (3) EPC; wherein**

said feature or group of features does not combine with the group of remaining features of the claim in a way such that the **combination of both groups of features has a **different technical character** to that of the group of remaining features of the claim **when considered on its own.****

If the answer to this question is yes then said feature or group of features is considered to be non-technical.

EPO Practice

Cluster
“Computers”

Requirements
of the EPC

Technicality

EPO Practice

Statistics

based on the **technical** implementation set out in the claims and description:

identify
closest prior art
in the field of technology

IF:
so widely known as to be
considered as **common-place**
e.g. computer network or
general purpose computer

THEN:
no **written** evidence is necessary
to prove its existence

[possible no-search]

OTHERWISE:
search for the closest
document describing
the technical features.

EPO Practice

Cluster
“Computers”

Requirements
of the EPC

Technicality

EPO Practice

Statistics

4. Identify **all the differences** between the subject matter of the claim and the closest prior art

a)

if there
are none

object
under
Art. 54

b)

if the differences are
not technical

no objective
technical
problem

object. technical
problem =
implementation/
automation of
requirements specification

object
under
Art. 56

double-check: Is there a non-obvious technical effect achieved by the non-technical features in combination with the technical features?

EPO Practice

Cluster
“Computers”

Requirements
of the EPC

Technicality

EPO Practice

Statistics

4. Identify **all the differences** between the subject matter of the claim and the closest prior art

c)

if differences =
mix of **non-technical** & **technical** features

i) formulate the objective technical problem
taking into account the requirements specification
*e.g. "how to adapt system of CPA in order to implement
the business concept"*

Solution:

solution of the objective technical problem must require
the technical features of the above identified differences.

ii) if the solution of the technical problem is obvious

→ object under Art. 56

d)

if differences
are purely
technical

apply
classical
PSA

double-check: Is there a non-obvious technical
effect achieved by the non-technical features
in combination with the technical features?
