PATENTES

4º trimestre 2021

OBJETIVOS DE DESARROLLO SOSTENIBLE

NIPO 116-20-001-5

La emergencia sanitaria provocada por la pandemia de COVID-19 ha dado lugar a una inmensa actividad en el terreno científico y tecnológico dirigida a combatir la enfermedad y su agente causante, el SARS-CoV-2. En este contexto, el acceso rápido a la información, que se va generando a un ritmo sin precedentes, resulta de gran importancia.

La [Oficina Española de Patentes y Marcas](#), en cumplimiento de su doble objetivo de proteger y fomentar la innovación tecnológica en España, así como de divulgar la información técnica que contienen las patentes, se suma a la estrategia global de difusión de la información ofreciendo distintos servicios de Información Tecnológica, entre ellos los 16 Boletines de Vigilancia Tecnológica, al que se añade éste último.

Los [Boletines VT](#) se vienen publicando desde el año 2000 con periodicidad trimestral, siendo el objetivo de este Boletín dar a conocer las nuevas solicitudes de patente que se publican a nivel mundial relacionadas con la prevención, control, diagnóstico y tratamiento de las enfermedades causadas por coronavirus en humanos, y en particular, aquellas que se refieren a COVID-19 y al virus SARS-CoV-2.

Los listados de documentos se presentan distribuidos en los cuatro apartados que se indican a continuación.

El primer apartado, relativo a invenciones en el campo técnico de los antivirales, es el que tiene una mayor cobertura. Incluye documentos que tienen por objeto agentes químicos, sean éstos no biológicos o biomoléculas, con función antiviral específica, así como vehículos para la administración al paciente de dichos agentes.

Contenido

[ANTIVIRALES Y OTROS AGENTES PARA TRATAR PATOLOGÍAS ASOCIADAS A LA ENFERMEDAD VIRAL](#)

[VACUNAS](#)

[DIAGNÓSTICO](#)

[DISPOSITIVOS PARA EL TRATAMIENTO O CONTROL DE LA INFECCIÓN VÍRICA](#)

Además, este primer bloque se refiere a compuestos químicos o composiciones con efecto antimicrobiano inespecífico útiles para la inactivación de las partículas virales. La cobertura del grupo se extiende asimismo a herramientas moleculares y/o métodos útiles para el *screening* de nuevos agentes antivirales; y a productos que, sin tener una acción antiviral, son aplicables al tratamiento de las patologías asociadas a la infección vírica.

Debe tenerse en cuenta que algunos de los documentos son encuadrables en más de uno de los apartados considerados. En estos casos, se ha adoptado el criterio de incluir el documento en todos los grupos pertinentes para facilitar la consulta al lector.

Durante el cuarto trimestre de 2021, el número de solicitudes de patente publicadas en relación con SARS-Cov-2 y COVID-19 ha experimentado un aumento del 185% con respecto al trimestre anterior, atribuible a la publicación, transcurridos los dieciocho meses legales, de un gran número de solicitudes internacionales PCT que se depositaron en los meses iniciales de la pandemia o que reivindican la prioridad de solicitudes presentadas en ese periodo. Esto contrasta con el predominio de la publicación de solicitudes de patentes de China que se

ha venido observando en los trimestres anteriores.

Ante este espectacular aumento del número de publicaciones, se ha optado por redimensionar el Boletín modificando su contenido. Así, los listados, clasificados en los cuatro apartados habituales, muestran ahora **los documentos de patentes europeas, PCT y nacionales de origen europeo, publicados en este cuarto trimestre de 2021**, lo que permite conocer aquellas tecnologías que se están desarrollando concretamente en el ámbito europeo.

Para completar la información, también se incluye una serie de datos estadísticos sobre las patentes publicadas a nivel mundial y a nivel europeo, mostrando el origen o nacionalidad de la tecnología, la proporción de documentos relativos a cada sector y los solicitantes europeos más activos.

El propósito de este Boletín es que la información aportada, sirva para identificar tendencias tecnológicas y sus actores, así como para contribuir a la utilización del conocimiento contenido en los documentos de patente como punto de partida para emprender nuevas actividades de investigación y desarrollo. Para suscribirse a este Boletín basta con cumplimentar este [formulario de suscripción](#).

ANÁLISIS ESTADÍSTICO DE LAS SOLICITUDES DE PATENTE PUBLICADAS EN EL 4º TRIMESTRE DE 2021

Se ha realizado un estudio estadístico los datos de las publicaciones de solicitudes de patentes publicadas desde en el 4º trimestre de 2021 utilizando la base de datos Global Patent Index (GPI) de la Oficina Europea de Patentes. En el periodo considerado, se han recuperado un total de 2581 familias de patentes, que corresponden a 3302 documentos de patente.

En la Gráfica 1 se recoge la distribución por oficinas de publicación, con más de un 50% correspondientes a solicitudes PCT.

Gráfica 1. Solicitudes por Oficina de publicación

En la Gráfica 2. se muestra la distribución por sectores tecnológicos. Predominan las solicitudes de patentes relacionadas con antivirales y otros agentes para tratar patologías asociadas a la enfermedad viral que representan un 36% del total, seguidas por las referidas a Diagnostico con un 27% y Vacunas con un 23%. El grupo menos numeroso es el que recoge los dispositivos para el tratamiento o control de la infección vírica con un 14%.

Gráfica 2.

Del total global de documentos recuperados, con la finalidad de analizar la situación en Europa de las patentes se han seleccionado solicitudes PCT y europeas con prioridad europea junto con patentes nacionales de países europeos, que constituyen un grupo de 511 familias que corresponden a 785 documentos de patente. En la Gráfica 3 se muestra su distribución por país de residencia del solicitante.

Gráfica 3

Se puede apreciar que Alemania figura en primer lugar, seguido de Francia, Gran Bretaña, Suiza e Italia. En el caso de España, nuestro país figura en el noveno lugar, con 20 solicitudes de patentes publicadas.

En la Gráfica 4. Se muestra la distribución de estas solicitudes de origen europeo por los 20 solicitantes más frecuentes. España aparece representada por el Consejo Superior de Investigaciones Científicas (CSIC) que aparece en octava posición con un total de 8 solicitudes de patentes

Gráfica 4.

Por último, en la Gráfica 5. Se muestra la distribución por tecnologías de estas solicitudes de origen europeo, donde se observa un claro predominio del grupo de Antivirales y agentes para tratar patologías asociadas a la enfermedad viral

Gráfica 5.

“10 PATENTES ESPAÑOLAS QUE HAN HECHO HISTORIA”: EL NUEVO VIDEO REALIZADO POR "QUANTUM FRACTURE" Y PROMOCIONADO POR LA OEPM

La [Oficina Española de Patentes y Marcas, O.A. \(OEPM\)](#), en el marco de su [Plan Estratégico](#), busca

promover de forma innovadora el uso de la Propiedad Industrial con la finalidad de transformar la sociedad basada en el conocimiento en generadora de valor y catalizadora de la transformación tecnológica e industrial de nuestro país.

Para ello, se ha lanzado recientemente un video promocionado por la OEPM en el conocido canal de YouTube Quantum Fracture, con José Luis Crespo a la cabeza, donde durante unos 16 minutos se realiza un recorrido histórico de las patentes a través de una cuidadosa selección de las mismas con el fin de dar a conocer su utilidad y su importancia para promover de la innovación y el avance

hacia una sociedad más innovadora a la vez que más justa y sostenible.

La elección de José Luis Crespo para conducir esta pieza audiovisual fue motivada por su formación en Física y su actividad como divulgador científico, lo que le conecta indirectamente con la base del mundo de las patentes. Su narración, unida a las animaciones sobre inventos que van desde el siglo XV hasta nuestros días, y a las entrevistas con inventores y personal de la OEPM: el Director de la OEPM, José Antonio Gil Celedonio, la Directora del Departamento de Patentes e Información Tecnológica, María José de Concepción y la responsable del Archivo Histórico de la OEPM, Ana Naseiro, hacen de este vídeo un instrumento eficaz de difusión que esperamos sea fructífero.

¡Esperamos que os guste tanto como a nosotros!

REELECCIÓN DE LEOPOLDO BELDA, JEFE DE ÁREA DE PATENTES DE MECÁNICA GENERAL Y CONSTRUCCIÓN, COMO PRESIDENTE DEL COMITÉ PERMANENTE DE DERECHO DE PATENTES DE LA OMPI EN LA SCP33

Por un año más nuestro compañero Leopoldo Belda Soriano (Jefe de área de patentes de mecánica general y construcción de la [OEPM](#)), fue reelegido Presidente del Comité Permanente de Derecho de Patentes de la [Organización Mundial de la Propiedad Intelectual \(OMPI\)](#).

Su reelección tuvo lugar en la celebración de la [trigésimo tercera sesión del Comité Permanente de Derecho de Patentes](#) (SCP por sus siglas en inglés) celebrada en la OMPI en Ginebra los pasados 6 y 9 de diciembre.

Además de su reelección, los debates giraron alrededor de los 5 temas habituales del Comité en los últimos años: Excepciones y limitaciones a los derechos de patentes, Calidad de las Patentes, Patentes y Salud, Confidencialidad en las comunicaciones entre agentes de patentes y clientes, y Transferencia de Tecnología.

Asimismo, destacaron las sesiones de intercambio de experiencias en relación con la utilización de la IA por las Oficinas de Patentes, donde se apreció que esta tecnología se está incorporando a un gran número de oficinas y las presentaciones en relación con las bases de acceso gratuito sobre la situación legal de las patentes sobre medicamentos y vacunas; Pat-informed, Medicines Patent Pool y el registro farmacéutico de la Organización Euroasiática de patentes. La OEPM participó con declaraciones y presentaciones en relación con el informe sobre el sistema internacional de patentes, la calidad de las patentes, la confidencialidad en las comunicaciones y la transferencia de tecnología.

CAMPAÑA SENSIBILIZACIÓN FRENTE A FALSIFICACIONES OEPM 2021

La nueva campaña de sensibilización frente a la compra de productos falsificados este año busca estimular la compra de productos originales. El pasado 26 de noviembre tuvo lugar el acto oficial de presentación por parte de la Ministra Reyes Maroto, acompañada del Presidente de la OEPM Pablo Garde y el Director de la misma, José Antonio Gil Celedonio. En sus intervenciones destacaron el compromiso del Ministerio de Industria, Comercio y Turismo con la defensa de los derechos de

propiedad industrial (DPI) y la lucha frente a su vulneración.

El objetivo de esta campaña es concienciar a los consumidores para que compren productos originales por los efectos secundarios positivos que conlleva: impulsa el comercio local, fomenta la innovación, protege el medio ambiente, reactiva la economía, cuida la salud, protege tus derechos como consumidor y genera empleo de calidad. Con el lema “Comprar productos originales, tiene efectos secundarios positivos” la campaña se difunde en medios de comunicación entre el 10 y el 20 de diciembre, coincidiendo con el pico anual de consumo en los hogares por la cercanía de Black Friday y Navidad.

La campaña estará presente en televisión, radio, prensa, internet, así como en redes sociales con la etiqueta #efectossecundarios.

En el siguiente enlace se encuentra el material de esta campaña, que se complementa con el spot que podrá visionar en la página web:

<https://stopfalsificaciones.oepm.es/index.html>

Esta campaña es uno de los Proyectos del Plan Estratégico 21-24 de la OEPM incluido dentro del Objetivo General 4: Impulsar la lucha contra la falsificación y la vulneración de los derechos de Propiedad Industrial (DPI).
