

PATENTES

IMPRESIÓN 3D

2

**Vigilancia
Tecnológica**
2º trimestre 2020

NIPO: 116-19-050-9

Aunque en los años 80 comenzaron a desarrollarse los primeros equipos y materiales sobre la tecnología de impresión 3D también denominada fabricación aditiva, no fue hasta 1986 cuando aparece en el mercado la primera impresora 3D comercial, patentada por Charles W. Hull, premiado por la Oficina Europea de Patentes como inventor del año en 2014 en la categoría de inventores no europeos. Cuando trataba de buscar un sistema para mejorar el proceso de realización de prototipos de pequeñas piezas de plástico que utilizaba para testar nuevos diseños de productos, desarrolló una máquina de impresión 3D que conseguía realizar en pocos minutos procesos que por aquel entonces llevaban semanas.

Desde entonces, la tecnología no ha parado de evolucionar, especialmente en los últimos años, alcanzándose a partir de 2017 un verdadero auge, cuando se incorpora la automatización utilizando software de inteligencia artificial que permite industrializar la fabricación aditiva y multiplicar la capacidad de los sistemas. En estos momentos, en que la pandemia del coronavirus SARS-CoV-2 azota a la población mundial, la impresión 3D se ha puesto de gran actualidad. La necesidad de fabricar de forma urgente respiradores o material de protección personal ha despertado el interés por la utilización de esta tecnología, surgiendo así multitud de iniciativas públicas y privadas.

PROCESAMIENTO
DE DATOS

Desde la Oficina Española de Patentes y Marcas, y en cumplimiento de su doble objetivo de proteger y fomentar la innovación tecnológica en nuestro país, así como de divulgar la información técnica que contienen las patentes a través de sus servicios de Información Tecnológica, se realiza este nuevo Boletín de Vigilancia Tecnológica, que se suma a los diecisésis *Boletines VT* que venimos publicando desde el año 2000 con periodicidad trimestral. Nuestro objetivo es dar a conocer las nuevas solicitudes de patentes que se publican a nivel mundial relacionadas con la tecnología de impresión 3D.

En este del Boletín, se incluye una selección de las solicitudes de patentes publicadas a nivel mundial durante el segundo trimestre de 2020, distribuidas en cinco apartados: procesos,

materiales, dispositivos, equipos auxiliares y procesamiento de datos.

Para cada patente se incluye su número de publicación, con un enlace que permite la consulta del documento completo, el solicitante, el país de origen y su título.

Esperamos que la información aportada en este Boletín de Vigilancia Tecnológica, sirva para identificar tendencias tecnológicas y sus actores, así como para contribuir a la utilización del conocimiento contenido en los documentos de patente como punto de partida para emprender nuevas actividades de investigación y desarrollo. Para suscribirse a este Boletín basta con cumplimentar este [formulario de suscripción](#).

Procesos

Nº PUBLICACIÓN	SOLICITANTE Y PAÍS DE ORIGEN	CONTENIDO TÉCNICO
CN111216356	(QUAN-N) QUANZHOU PEAK SHOES CO LTD	Method for manufacturing 3D printed garment fabric and ready-made garment
DE102019130131	OPEN BIONICS LTD [GB]	Improvements in or regarding additive manufacturing
WO2020096787	EASTMAN KODAK CO [US]	Electrophotography-based 3D printing with improved layer uniformity
CN111086204	(SHEN-N) SHENZHEN CONE TECHNOLOGY CO LTD	3D printing method mixing modified carbon nanotube filaments with molten resin
EP3650200	PRODWAYS [FR]	Method and devices for quick detection and calibration of a 3D printer using a viscous material
WO2020087048	MAKE COMPOSITES INC [US]	Systems and methods of printing with fiber-reinforced materials
EP3640013	3D GENCE SPOLKA Z OGRANICZONĄ ODPOWIEDZIALNOŚCIĄ [PL]	Method for manufacturing spatial objects
WO2020076734	KERACEL INC [US]	Three-dimensional, additive manufacturing system, and a method of manufacturing a three-dimensional object
CN110920050	TSINGHUA BERKELEY SHENZHEN INSTITUTE PREPARATION OFFICE	3D printing method, system and product
FR3086567	NORIMAT [FR]	Method for producing counterform and method for manufacturing complex shape part using such a counterform

Nº PUBLICACIÓN	SOLICITANTE Y PAÍS DE ORIGEN	CONTENIDO TÉCNICO
EP3628468	REBUILD SP Z O O [PL]	Device and method for the creating of supports, formworks, or structures made of foamed plastics, as well as device and method for the creating of constructions
US2020086553	ALIGN TECHNOLOGY INC [US]	Hybrid 3D printing with photo-curable materials
KR20200023698	(A) PARK SUNG JAI [KR]	(A B1) FDM 3D, 3D hull bending template production system based on FDM
EP3623136	FRAUNHOFER GES FORSCHUNG [DE]	Method for producing three-dimensional hydrogel structures and device for the layerwise building-up of such hydrogel structures
CN110834410	UNIV SOUTHERN MEDICAL	Method for PDMS complex three-dimensional structure forming based on 3D printing
EP3639952	GEN ELECTRIC [US]	Additive manufacturing systems and methods including louvered particulate containment wall
US2020086568	INTREPID AUTOMATION [US]	Additive manufactured parts with smooth surface finishes
CN111111800	(UYQI) UNIV TSINGHUA	Preparation method and sensor of flexible micro-channel
WO2020091773	HEWLETT PACKARD DEVELOPMENT CO [US]	Sinterable setter with interface layer
WO2020075173	UNIV RAMOT [IL]	Meniscus-confined three-dimensional electrodeposition
US2020101714	XEROX CORP [US]	Method for missing ejector compensation in three-dimensional object printing
US2020101713	MIMAKI ENG CO LTD [JP]	Method for forming 3D object
EP3627255	XYZPRINTING INC [TW]; KINPO ELECT INC [TW]	Method for detecting object border of 3D printer
US2020166879	BOSCH GMBH ROBERT [DE]	Method for producing a component and manufacturing device
