

Oficina Española
de Patentes y Marcas

OBJETIVOS
DE DESARROLLO
SOSTENIBLE

El Boletín de Vigilancia Tecnológica en Sanidad Animal es el resultado del trabajo conjunto de la Oficina Española de Patentes y Marcas (OEPM) y la Fundación Vet+i -Plataforma Tecnológica Española de Sanidad Animal, quienes han aunado esfuerzos para ofrecer a los adheridos de Vet+i y a cualquier interesado en sanidad animal, una información puntual, esquemática y de rápida lectura sobre las últimas patentes publicadas en este campo.

Este boletín número cincuenta y seis recoge una selección de las solicitudes de patentes publicadas a nivel internacional durante el cuarto trimestre de 2024 en el ámbito de la sanidad animal, las cuales aparecen distribuidas según la especie animal de aplicación de las mismas.

Asimismo, se incorpora un capítulo que recoge solicitudes de patentes sobre tecnologías de aplicación general y contiene un apartado de enlaces a [noticias](#) de

interés en materia de propiedad industrial, así como sobre las actividades de la Plataforma.

El boletín, que tiene una periodicidad trimestral, se enmarca dentro del convenio de colaboración suscrito por ambas organizaciones para facilitar, impulsar y estimular el conocimiento y la utilización de los derechos de Propiedad Industrial por parte de las organizaciones y empresas adheridas a la Fundación Vet+i.

Se puede acceder al listado de solicitudes de patentes para cada grupo pulsando sobre las imágenes que aparecen a continuación.

Número de publicación	Solicitante	País de origen	Contenido técnico
CN119119216A;	(UYSW)	China	New bovine type A <i>Pasteurella multocida</i> PM1790 protein useful for preparing vaccine for preventing <i>Pasteurella multocida</i> infection
WO2024263682A1;	Can Tech Inc	USA	Composition used for preventing, reducing, or eliminating mastitis infection in bovine animal, comprises inhibitory composition, where inhibitory composition comprises microbial composition or extract of microbes of mammary system-associated microbiota of healthy bovines
AU2024219856A1; WO2024232765A1;	Koru Biotech Solutions Ltd	Australia	Treating or preventing disease or condition caused by or associated with bacterial infection in subject e.g. brucellosis, cholera, pertussis, plague, sepsis and typhoid, involves administering to subject immunoglobulin that is capable of binding specifically to bacterial lipopolysaccharides
CN118903475A;	Harbin Veterinary Res Institute Caas Harbin Branch Of China Animal Health And Epidemiology Center	China	Use of recombinant protein <i>Mycoplasma mycoides</i> subspecies <i>mycoides</i> (rMmm604) in resisting Mmm infection and for treating contagious bovine pleuropneumonia
CN119015267A;	Harbin Veterinary Res Institute Caas Harbin Branch Of China Animal Health And Epidemiology Center	China	Use of hemicylophenol, cottenpol or its derivative analogs in preparation of veterinary drugs for livestock and poultry, veterinary drugs for aquaculture, crop fungicides, crop virus control agents, and products for agricultural pest control

Número de publicación	Solicitante	País de origen	Contenido técnico
JP2024140758A;	(Nhfo)	Japan	New bacteriophage, its original strain, or subcultured strain used in bacteriophage composition is preserved in National Institute of Technology and Evaluation, for inhibiting/controlling the growth and proliferation of F4-positive Escherichia coli, and treating or preventing Colibacillosis
CN118787633A; CN118787633BB;	Shandong Ark Biological Tech Co Ltd	China	Use of Sophora flavescens extract-based flavonoids G i.e. (2S)-2-(2,4-dihydroxyphenyl)-5,7-dihydroxy-8-((2R)-5-methyl-2-(prop-1-en-2-yl)hex-4-en-1-yl)-3,4-dihydro-2H-1-benzopyran-4-one in preparing product for preventing and treating pathogenic bacteria in dairy cows
CN118834791A;	Hebei Normal Univ Of Science And Technology	China	New Pasteurella multocida PmQA-1, used in eosinophil cationic proteins, which is used in preparation of vaccines, where vaccine is inactivated or subunit vaccine, and vaccine is bovine Pasteurella multocida vaccine
	Shijiazhuang Shengao Biological Tech Co Ltd		
CN118995638A;	Guangdong Haid Animal Husbandry And Veterinary Res Institute Co Ltd	China	New bovine herpesvirus 1 attenuated virus strain BoHV-1GD04M used in preparation of products comprising vaccine or drug, and diagnostic reagents for preventing and/or treating bovine infectious rhinotracheitis and regulating pathogenicity of bovine herpesvirus type 1
CN118878630A;	Nanjing Agricultural Univ Sanya Research Institute	China	New ruminant digestive tract-derived antibacterial peptide, which comprises screened based on deep learning model, used in preparation of anti-infective drugs or animal feed additives

Número de publicación	Solicitante	País de origen	Contenido técnico
WO2024211502A2; US2024366690A1;	Vytelle Llc	USA	Increasing fertility in cattle, comprises administering microbiome supplement comprising combination of bacteria e.g. Aerococcaceae unclassified, Planomicrobium, Staphylococcaceae unclassified, Paludibacter, Brevundimonas and Staphylococcus
CN118844436A;	Gaungxi Tianyuan Biochemistry Co Ltd	China	Use of nitrostyrene compound in preventing plant disease and food-borne pathogenic bacteria e.g. Rhizoctonia solani, Sclerotinia sclerotiorum, wheat scab, rice blast, Bacillus cereus, Listeria monocytogenes, Salmonella enterica subsp. enterica, and dairy cow mastitis pathogenic bacteria
WO2024226643A1;	Int N&H Denmark Aps Danisco Us Inc	Denmark	Animal diet useful for improving animal performance on metric e.g. increased feed efficiency and improved nitrogen retention, and reducing pathogenic bacteria populations in animal, comprises engineered phytase polypeptide
	Danisco Us Inc	USA	
CN118813590A;	Baikuirui Shenzhen Biotechnology Co Ltd	China	New fusion protein of lysozyme and lysostaphin, where lysostaphin and lysozyme are linked by connecting peptide, preferably lysostaphin, connecting peptide and lysozyme are connected, used for inhibiting Staphylococcus aureus and/or Escherichia coli and treating and preventing bovine endometritis
WO2024200687A1;	Univ Gent	Belgium	New fusion protein comprising cell penetrating peptide, enzymatic activity domain, and cell wall binding domain comprising specified amino acid sequence used for treating infection caused by e.g. Streptococcus uberis and treating mastitis
	Univ Leuven Kath		

Número de publicación	Solicitante	País de origen	Contenido técnico
CN118909958A;	China Inst Veterinary Drugs Control	China	New bovine parainfluenza virus type 3 nucleoprotein hybridoma cell BPIV3 Mab-NP-11 strain used for preparing reagent for detecting bovine parainfluenza virus type 3
CN119040277A;	Univ Jinan	China	New Escherichia coli bacteriophage GaoH6-13E used in preparation of drug for treating diseases caused by Salmonella and/or Escherichia coli, in bactericidal composition for preventing and controlling Salmonella and Escherichia coli and in livestock and poultry breeding
CN119074787A;	Harbin Veterinary Res Institute Caas Harbin Branch Of China Animal Health And Epidemiology Center	China	Extracting of total flavone of water hyacinth useful for treating calf diarrhea, comprises drying water hyacinth, crushing, adding ethanol solution, performing ultrasonic extraction, filtering, concentrating, inspecting parameters, designing Box-Behnken response surface, testing, and analyzing data
CN118931800A;	Shandong Hongqi Biotechnology Co Ltd	China	New Bacillus subtilis useful for preparing antibacterial product for e.g. Escherichia coli or Clostridium perfringens, as additive in feed for livestock breeding, and for inhibiting intestinal inflammation and promoting animal digestion
WO2024241086A1;	Ambrx Inc	USA	New conjugated protein useful e.g. for treating disease or condition e.g. bovine respiratory disease in mammal, comprises engineered bovine interferon-lambda 3 protein comprising non-natural amino acid and water-soluble polymer
CN119040274A;	Univ Heilongjiang Bayi Agricultural	China	New Salmonella phage vB_Salm-ps4 used for preparing preparation for inhibiting and/or removing Salmonella and preparing preparation for inhibiting and/or removing Escherichia coli, where preparation includes preparation for targeting Salmonella polysaccharides and/or removing Salmonella biofilm

Número de publicación	Solicitante	País de origen	Contenido técnico
CN118787663A;	Heilongjiang Bayi Agricultural Univ	China	Use of milk cow milk-derived extracellular vesicles for inhibiting growth of <i>Staphylococcus aureus</i> by increasing active oxygen content in <i>Staphylococcus aureus</i> , reducing antioxidant enzymes activity and inhibiting energy metabolism and inhibiting <i>Staphylococcus aureus</i> biomembrane generation
CN119040228A;	Univ Inner Mongolia Agri	China	New strain of <i>Enterococcus mundtii</i> HCD01, used for inhibiting <i>Salmonella</i> and <i>Streptococcus dysgalactiae</i> , and preparing probiotics for relieving symptoms of <i>Salmonella</i> infection, increasing abundance of beneficial bacteria in intestinal flora, and relieving intestinal damage caused by <i>Salmonella</i>
CN118930617A;	Univ Shenyang Agricultural	China	New <i>Staphylococcus aureus</i> bacteriophage Lm44 perforin comprising specific amino acid used in preparation of drug for treating bovine mastitis and providing good antibacterial effect
WO2024250024A2;	Us Health	USA	New recombinant parasite of phyla Apicomplexa or Euglenozoa comprising genome that lacks native homolog of <i>Toxoplasma gondii</i> IFT88 gene, <i>Toxoplasma gondii</i> SRS15A, SRS15B and/or SRS15C gene, and/or <i>Toxoplasma gondii</i> SRS26B gene
	Us Agriculture		
	Biologicke Centrum Av Cr V V I	Czech Republic	
CN118873138A;	Wu Chunjian	China	Milk cow brucella disease quarantine blood collecting device, has spring rod that adopts clearance fit through lower end of adjusting sliding rod, and spring rod fixedly installed in inner side of upper end of spring rod
CN118976015A;	Univ China Agricultural	China	Composition useful for preparing bacteriostatic agent or antibacterial medicine and preparing medicine for preventing and treating intracellular bacterial infection in livestock and poultry caused by e.g. <i>Mycobacterium tuberculosis</i> , comprises emodin and rhein

Número de publicación	Solicitante	País de origen	Contenido técnico
CN118909856A;	Univ Nanjing Agricultural	China	New Lactiplantibacillus plantarum 6-14 used for resisting multiple drug-resistant bacteria, in preparing probiotics preparation and in preparing microbial preparation with antibacterial effect by inhibiting drug-resistant bacteria and/or non-drug-resistant bacteria
CN118750512A;	Yang Jinfeng	China	Medicine useful for treating cow vulvovaginitis comprises Wanjinshui, dexamethasone sodium phosphate, vitamin B12, physiological saline and cobalt chloride
US2024325474A1;	Benjamin Daniel	USA	Medicinal composition used for preventing disease caused by viral pathogens, comprises organic liquid extract derived from Laminaria japonica or Andrographis paniculata, antifoaming agent, antimicrobial, anti-inflammatory agent, anti-aging agent, antiseptic agent, plant-derived oil, thickening agent
	Denommee Dianne		
	Lorchak David		
CN118792321A;	Southwest Univ For Nationalities	China	New bovine nebovirus VP1 gene comprising nucleotide sequence, for use in bovine nebovirus-like particle for preparation of bovine diarrhea vaccine and drug
CN118726159A;	Hebei Inatural Biotechnology Co Ltd	China	Lactic acid microbial inoculum for rapidly reducing the somatic cell count of dairy cows used in preparation of medicine or feed additive for reducing somatic cell count in milk produced by dairy cows with latent mastitis or dairy cows without mastitis, comprises Bifidobacterium longum L693
CN119061038A;	(Unlc)	China	New bovine dual interferon gene useful in resisting bovine viral diseases i.e. foot-and-mouth disease and bovine viral diarrhea

Número de publicación	Solicitante	País de origen	Contenido técnico
CN118846024A;	Inst Of Special Animal And Plant Sciences Of Caas	China	Preparing bovine viral diarrhea virus Erns-E2 subunit vaccine by optimizing nucleotide sequence of bovine viral diarrhea virus Erns protein and E2 protein, obtaining recombinant plasmid, obtaining Erns protein and E2 protein, and mixing Erns protein and E2 protein and adding vaccine adjuvant
CN118834838A;	Inner Mongolia Agricultural Univ	China	New hybridoma cell line secreting bovine viral diarrhoea virus monoclonal antibody useful in preparing bovine viral diarrhea virus detection product, comprising hybridoma cell line A and hybridoma cell line B
CN118903003A;	Ruicheng Lyuman Biological Pharmaceutical Co Ltd	China	Suspension injection for dairy cow mastitis, comprises active component, organic solvent, surfactant, surface modifier, stabilizer, antiseptic bacteriostat, thixotropic agent, antioxidant and local anesthetic, where the active component is piperacillin or piperacillin hydroiodate
CN118878701A;	Jiangnan Univ	China	Modifying antimicrobial peptide used in preparing active product for inhibiting <i>Staphylococcus aureus</i> comprises modifying bovine lactoferricin antimicrobial peptide Lactoferricin by fusion expression of bovine lactoferricin antimicrobial peptide Lactoferricin with Lactoferrapin or mutating
WO2024225654A1;	Univ Gachon Ind Acad Coop Found	South Korea	New bacteriophage vB-SbRt-pBovineB21, used for inhibiting or killing growth of <i>Streptococcus bovis</i> / <i>Streptococcus equinus</i> complex e.g. <i>Streptococcus ruminicola</i> and lactic acid-producing bacteria e.g. <i>Streptococcus infantarius</i> subsp. <i>infantarius</i> , and for treating rumen hyperacidity

Número de publicación	Solicitante	País de origen	Contenido técnico
CN118994330A;	Univ Yangzhou	China	New bovine leukemia virus specific eukaryotic recombinant protein useful in competition enzyme-linked immunoassay test for detecting bovine leukaemia virus specific antibody
WO2024235285A1; CN118994329A;	Beijing Westar Biosciences Co Ltd	China	New mutant respiratory syncytial virus (RSV) F protein comprising amino acid mutation, which stabilizes recombinant RSVF protein in pre-fusion conformation useful in preparing vaccine or medicine for treating RSV infection-related diseases
CN119015233A;	Shandong Dezhou Shenniu Animal Health Products Co Ltd	China	Preparing decoquinate nanopowder used in treating Plasmodium in livestock and poultry, comprises e.g. adding hydroxypropyl methylcellulose, maltodextrin and pure water, adding decoquinate into solution, grinding, adding suspension to solution, cutting, and spray drying decoquinate nano suspension
CN118845646A; CN118845646BB;	China Agricultural Univ	China	Tylvalosin tartarate nanosuspension comprises tylvalosin tartarate useful in preparing medicine for treating livestock bacterial infection and mycoplasma disease, latent solvent, alkaline reagent, stabilizing agent, water and crystallization auxiliary agent including e.g. polysorbate
CN118755676A;	Univ Qingdao Agricultural	China	New carbapenem-resistant <i>Pseudomonas aeruginosa</i> phage vB_PaeP_QSZH used as active ingredient in preparing medicine for treating infectious diseases caused by carbapenem-resistant <i>Pseudomonas aeruginosa</i> , and composition for killing <i>Pseudomonas aeruginosa</i> on body surface of livestock and poultry
CN118995500A;	(Bioa) Qingdao Bioantai Biotechnology Co Ltd	China	New marine-derived <i>Bacillus velezensis</i> strain RS3-13 useful in synthesis of amylase, cellulase, chitinase, and beta-glucanase

Número de publicación	Solicitante	País de origen	Contenido técnico
CN119015404A;	First Teaching Hospital Xinjiang Medical Univ	China	New Brucella recombinant multivalent epitope vaccine useful for e.g. preparing medicine for preventing and treating brucellosis, contains linear B cell epitope and linked conformational B cell epitope
WO2024227921A1;	Inbiose Nv	Belgium	Use of fucosylated mammalian milk oligosaccharide for preventing and/or treating shipping fever in animal, e.g. farmed or domesticated animal i.e. shipping fever pneumonia e.g. acute pneumonia and/or shipping fever diarrhea
WO2024249554A1;	The Charlotte Mecklenburg Hospital Authority D/B/A Atrium Health	USA	New carboxamide-based compound used in composition for treating cancer e.g. lymphoma, leukemia, melanoma, blastoma, sarcoma, myeloma, glioma, germ cell tumor and adrenal cancer, and disease such as non-cancer proliferative disease, autoimmune disease, infection, and inflammatory disease in subject
CN119019529A;	Univ Huazhong Agricultural	China	Use of WNT5A protein or gene encoding protein for regulating antiviral activity of host against bovine parainfluenza virus type 3 (BPIV-3) and preparing anti-BPIV-3 medicine and animal cells or species
CN118846030A;	Huazhong Agricultural Univ	China	Virus-like particle bivalent vaccine comprises virus-like particles containing bovine parainfluenza virus-3A type M protein and hemagglutinin-neuraminidase (HN) protein and virus-like particles containing bovine parainfluenza virus-3C type M protein and HN protein
CN118948809A;	Univ Ningxia	China	Disinfectant for film-forming, ventilating and anti-freezing milk cow nipple sterilizing product and for preventing external pathogens from invading mammary glands, comprises sterilizing active component, film forming agent/slow release agent, surfactant, skin care agent and solvent

Número de publicación	Solicitante	País de origen	Contenido técnico
CN119019530A;	Univ Huazhong Agricultural	China	Use of solute carrier family 16 member 13 (SLC16A13) protein or gene encoding SLC16A13 protein in regulating host antiviral activity and disease-resistant breeding and development of animals, where virus is bovine parainfluenza virus type 3 (BPIV-3)
WO2024257103A1;	Coppter Water Tech Ltd	Israel	Freshly prepared copper ion aqueous solution which is germicidal aerobically used to sanitize e.g. vegetables and fruits includes water-soluble cuprous complex and oxidized form of reductant dissolved in oxygen free water, exposing to air
WO2024199479A1;	Prime Gene Therapeutics Co Ltd	China	New nitrogen-containing macrocyclic compounds useful as TYK2 allosteric inhibitor to produce medicine for treating tyrosine kinase 2-mediated disease e.g. inflammatory autoimmune diseases, leukemia, lymphoma, and neurodegenerative diseases
WO2024232379A1;	Univ Tohoku	Japan	Muscle atrophy inhibitor and/or muscle enhancer used for treating muscle atrophy caused by aging, disuse, neurogenic causes, malnutrition or steroid, comprises active ingredient comprising substance that increases amount of megakaryoblastic leukemia 1 and/or megakaryoblastic leukemia 2
CN119020204A;	Univ China Agricultural	China	New <i>Bacillus coagulans</i> BCHO used in preparation of antibacterial biological products, preferably gram-positive pathogens including <i>Staphylococcus aureus</i> , <i>Listeria monocytogenes</i> , and <i>Clostridium perfringens</i> , and as feed additive for improving intestinal flora of animals

Número de publicación	Solicitante	País de origen	Contenido técnico
CN118806803A;	Shanghai Acad Of Agricultural Sciences	China	Livestock and poultry immune enhancing composition used for preparing immunoenhancing drug and for providing antibacterial effects, comprises <i>Cordyceps militaris</i> secondary extract, potassium diformate and <i>Lactobacillus casei</i>
CN118994436A;	Univ Beijing Agriculture	China	Preparing gallic acid-grafted chitosan useful in preparing medicine for preventing and treating mastitis, comprises reacting chitosan and benzaldehyde, performing esterification, mixing with hydrochloric acid solution to obtain intermediate, reacting with gallic acid complex solution system
CN118986936A;	Univ Beijing Agriculture	China	Preparing gallic acid grafted chitosan-loaded berberine hydrochloride nanoparticles for preparing medicine for treating mastitis, comprises mixing acetic acid solution with gallic acid chitosan with berberine hydrochloride, mixing sodium tripolyphosphate solution with obtained intermediate system
WO2024243481A1;	Univ Connecticut	USA	Composition used for generating bovine pluripotent embryonic stem cells, comprises cell culture medium, and supplement comprising e.g. wingless/integrated inhibitor, histone methyltransferase disruptor of telomeric silencing 1-like inhibitor and adenyl cyclase activator
WO2024213098A1;	Beijing Jitai Pharmaceutical Tech Co Ltd Hangzhou Jitai Pharmaceutical Tech Co Ltd	China	Lipid nanoparticle useful in medicine composition for treating spleen disease or spleen-related disease including blood system disease, infectious disease, immune disease, or cancer, comprises ionizable lipid and steroid compound

Número de publicación	Solicitante	País de origen	Contenido técnico
CN118853534A;	Chinese Acad Of Inspection And Quarantine	China	An immortalized sheep testicular cell line adapted to full suspension culture useful in virus propagation or preparation of virus vaccine, has at least one of the following characteristics: adapted to serum-free culture medium, and no oncogenic and no oncogenic risk
CN118853726A;	Yangtze Univ	China	Recombinant expression cassette used for preventing and treating diseases caused by Escherichia coli, comprises upstream homologous arm sequence amyEUp, magainin 2 coding region sequence mag2, downstream homologous arm sequence amyEDown and retaining coding region signal peptide sequence
WO2024227074A1;	Kriya Therapeutics Inc	South Korea	New expression cassette useful in pharmaceutical composition or kit for e.g. regulating expression of protein in mammalian cell, expressing protein in subject, and treating disease in mammal, contains promoter, upstream exon, and upstream intron
CN118954577A;	Jiangsu Agri Animal Husbandry Vocational College	China	Preparing nano gallium oxide particles useful in bacteriostatic, comprises mixing extract of Scindapsus ground coat plant with gallium salt solution, and burning reaction product at high temperature
WO2024231501A1; EP4461732A1;	Molecular Horizon S R L	Italy	New phenyl pyrazole based compound used in pharmaceutical or insecticidal composition for treating, controlling, suppressing, or eradicating, infection or infestation of insect (arthropod), such as adult insect, insect egg, insect larva, insect nymph, and/or insect pupa, e.g. poultry or red mites

Número de publicación	Solicitante	País de origen	Contenido técnico
CN118903199A;	Univ Northeast Agricultural	China	Alkaline mineral metal composition used in preparing medicine for preventing or treating virus infection of livestock caused by coronavirus, circovirus, rotavirus, arteritis virus and herpesvirus includes metal ion complex, mineral ion complex, alkaline rare earth soluble salt and composite gel

Ovino y Caprino

Número de publicación	Solicitante	País de origen	Contenido técnico
WO2024250024A2;	Us Health Us Agriculture	USA	New recombinant parasite of phyla Apicomplexa or Euglenozoa comprising genome that lacks native homolog of <i>Toxoplasma gondii</i> IFT88 gene, <i>Toxoplasma gondii</i> SRS15A, SRS15B and/or SRS15C gene, and/or <i>Toxoplasma gondii</i> SRS26B gene
	Us Agriculture		
	Biologicke Centrum Av Cr V V I	Czech Republic	
CN118878630A;	Nanjing Agricultural Univ Sanya Research Institute	China	New ruminant digestive tract-derived antibacterial peptide, which comprises screened based on deep learning model, used in preparation of anti-infective drugs or animal feed additives
CN118995500A;	Qingdao Bioantai Biotechnology Co Ltd	China	New marine-derived <i>Bacillus velezensis</i> strain RS3-13 useful in synthesis of amylase, cellulase, chitinase, and beta-glucanase
	Qingdao Marine Biomedical Res Institute Co Ltd		
	Bioantai Beijing Tech Co Ltd		
	Jiangsu Baiao Purui Biotechnology Co Ltd		
CN119015267A;	Cotton Res Inst Chinese Acad Agricultural Sci	China	Use of hemicylophenol, cottonopol or its derivative analogs in preparation of veterinary drugs for livestock and poultry, veterinary drugs for aquaculture, crop fungicides, crop virus control agents, and products for agricultural pest control

Número de publicación	Solicitante	País de origen	Contenido técnico
WO2024200687A1;	Univ Gent	Belgium	New fusion protein comprising cell penetrating peptide, enzymatic activity domain, and cell wall binding domain comprising specified amino acid sequence used for treating infection caused by e.g. <i>Streptococcus uberis</i> and treating mastitis
	Univ Leuven Kath		
CN119020204A;	Univ China Agricultural	China	New <i>Bacillus coagulans</i> BCH0 used in preparation of antibacterial biological products, preferably gram-positive pathogens including <i>Staphylococcus aureus</i> , <i>Listeria monocytogenes</i> , and <i>Clostridium perfringens</i> , and as feed additive for improving intestinal flora of animals
JP2024140758A;	(Nhfo)	Japan	New bacteriophage, its original strain, or subcultured strain used in bacteriophage composition is preserved in National Institute of Technology and Evaluation, for inhibiting/controlling the growth and proliferation of F4-positive <i>Escherichia coli</i> , and treating or preventing Colibacillosis
WO2024226643A1;	Int N&H Denmark Aps	Denmark;	Animal diet useful for improving animal performance on metric e.g. increased feed efficiency and improved nitrogen retention, and reducing pathogenic bacteria populations in animal, comprises engineered phytase polypeptide
	Danisco Us Inc	USA	
CN119040277A;	Univ Jinan	China	New <i>Escherichia coli</i> bacteriophage GaoH6-13E used in preparation of drug for treating diseases caused by <i>Salmonella</i> and/or <i>Escherichia coli</i> , in bactericidal composition for preventing and controlling <i>Salmonella</i> and <i>Escherichia coli</i> and in livestock and poultry breeding

Número de publicación	Solicitante	País de origen	Contenido técnico
CN118931800A;	Shandong Hongqi Biotechnology Co Ltd	China	New <i>Bacillus subtilis</i> useful for preparing antibacterial product for e.g. <i>Escherichia coli</i> or <i>Clostridium perfringens</i> , as additive in feed for livestock breeding, and for inhibiting intestinal inflammation and promoting animal digestion
CN119040274A;	Univ Heilongjiang Bayi Agricultural	China	New <i>Salmonella</i> phage vB_SalM-ps4 used for preparing preparation for inhibiting and/or removing <i>Salmonella</i> and preparing preparation for inhibiting and/or removing <i>Escherichia coli</i> , where preparation includes preparation for targeting <i>Salmonella</i> polysaccharides and/or removing <i>Salmonella</i> biofilm
CN118852369A;	Jiangsu Acad Of Agricultural Sciences	China	New sheep <i>Mycoplasma ovipneumoniae</i> immune-related protein comprising specific amino acid sequence, used for detecting <i>Mycoplasma ovipneumoniae</i> antibodies, and preparing anti- <i>Mycoplasma ovipneumoniae</i> infection preparation including vaccine preparation and anti-serum preparation
CN118909856A;	Univ Nanjing Agricultural	China	New <i>Lactiplantibacillus plantarum</i> 6-14 used for resisting multiple drug-resistant bacteria, in preparing probiotics preparation and in preparing microbial preparation with antibacterial effect by inhibiting drug-resistant bacteria and/or non-drug-resistant bacteria
CN119015233A;	Shandong Dezhou Shenniu Animal Health Products Co Ltd	China	Preparing decoquinate nanopowder used in treating <i>Plasmodium</i> in livestock and poultry, comprises e.g. adding hydroxypropyl methylcellulose, maltodextrin and pure water, adding decoquinate into solution, grinding, adding suspension to solution, cutting, and spray drying decoquinate nano suspension

Número de publicación	Solicitante	País de origen	Contenido técnico
CN118879613A;	China Agricultural Vet Bio Science And Tech Co Ltd	China	New green monkey kidney cell Vero-Chlorocebus sabaeus histone deacetylase 2 used in preparing histone deacetylase 2 protein, preparing cell line for promoting proliferation of peste des petits ruminant virus, and preparing cell line for promoting peste des petits ruminants virus vaccine production
WO2024264021A2;	Loam Bio Llc	Usa	Reducing methane emissions from ruminant comprises administering composition comprising fungal strain e.g. Penicillium, Trametes, and Phaeosphaeria biomass from fungal strain, or culture supernatant from fungal strain to ruminant
CN118853534A;	Chinese Acad Of Inspection And Quarantine	China	An immortalized sheep testicular cell line adapted to full suspension culture useful in virus propagation or preparation of virus vaccine, has at least one of the following characteristics: adapted to serum-free culture medium, and no oncogenic and no oncogenic risk
WO2024235285A1; CN118994329A;	Beijing Westar Biosciences Co Ltd	China	New mutant respiratory syncytial virus (RSV) F protein comprising amino acid mutation, which stabilizes recombinant RSVF protein in pre-fusion conformation useful in preparing vaccine or medicine for treating RSV infection-related diseases
WO2024225654A1;	Univ Gachon Ind Acad Coop Found	South Korea	New bacteriophage vB-SbRt-pBovineB21, used for inhibiting or killing growth of Streptococcus bovis/Streptococcus equinus complex e.g. Streptococcus ruminicola and lactic acid-producing bacteria e.g. Streptococcus infantarius subsp. infantarius, and for treating rumen hyperacidity

Número de publicación	Solicitante	País de origen	Contenido técnico
CN118976015A;	China Agricultural Univ	China	Composition useful for preparing bacteriostatic agent or antibacterial medicine and preparing medicine for preventing and treating intracellular bacterial infection in livestock and poultry caused by e.g. <i>Mycobacterium tuberculosis</i> , comprises emodin and rhein
CN118845646A; CN118845646BB;	China Agricultural Univ	China	Tylvalosin tartarate nanosuspension comprises tylvalosin tartarate useful in preparing medicine for treating livestock bacterial infection and mycoplasma disease, latent solvent, alkaline reagent, stabilizing agent, water and crystallization auxiliary agent including e.g. polysorbate
CN119039427A;	Lanzhou Veterinary Res Institute Chinese Academy Of Agricultural Sciences China Center For Animal He	China	New recombinant single B cell antibody against blue tongue virus in sheep comprising specific amino acid sequence used in in-vitro detection of bluetongue virus for non-disease diagnosis purposes and in preparation of reagents, test strips, or kits for detecting bluetongue virus
CN118755676A;	Univ Qingdao Agricultural	China	New carbapenem-resistant <i>Pseudomonas aeruginosa</i> phage vB_PaeP_QSZH used as active ingredient in preparing medicine for treating infectious diseases caused by carbapenem-resistant <i>Pseudomonas aeruginosa</i> , and composition for killing <i>Pseudomonas aeruginosa</i> on body surface of livestock and poultry
CN119015404A;	First Teaching Hospital Xinjiang Medical Univ	China	New <i>Brucella</i> recombinant multivalent epitope vaccine useful for e.g. preparing medicine for preventing and treating brucellosis, contains linear B cell epitope and linked conformational B cell epitope

Número de publicación	Solicitante	País de origen	Contenido técnico
WO2024199479A1;	Prime Gene Therapeutics Co Ltd	China	New nitrogen-containing macrocyclic compounds useful as TYK2 allosteric inhibitor to produce medicine for treating tyrosine kinase 2-mediated disease e.g. inflammatory autoimmune diseases, leukemia, lymphoma, and neurodegenerative diseases
US2024325474A1;	Benjamin Daniel	Usa	Medicinal composition used for preventing disease caused by viral pathogens, comprises organic liquid extract derived from <i>Laminaria japonica</i> or <i>Andrographis paniculata</i> , antifoaming agent, antimicrobial, anti-inflammatory agent, anti-aging agent, antiseptic agent, plant-derived oil, thickening agent
	Denommee Dianne		
	Lorchak David		
WO2024233747A1;	Celgene Corp	Usa	New N-(1H-pyrazol-4-yl) pyrazolopyrimidine-3-carboxamide-containing heteroaryl compound used in pharmaceutical composition for treating inflammatory or autoimmune disease
WO2024220480A2; WO2024220480A3;	Univ Leland Stanford Junior	Usa	New radiolabeled compounds used to image inflammation associated with increased G-protein coupled receptor 84 expression, and determine stage of disease e.g. Alzheimer's disease, multiple sclerosis, and glioblastoma
CN118853726A;	Yangtze Univ	China	Recombinant expression cassette used for preventing and treating diseases caused by <i>Escherichia coli</i> , comprises upstream homologous arm sequence amyEUp, magainin 2 coding region sequence mag2, downstream homologous arm sequence amyEDown and retaining coding region signal peptide sequence
CN118954577A;	Jiangsu Agri Animal Husbandry Vocational College	China	Preparing nano gallium oxide particles useful in bacteriostatic, comprises mixing extract of <i>Scindapsus</i> ground coat plant with gallium salt solution, and burning reaction product at high temperature

VT Porcino

Número de publicación	Solicitante	País de origen	Contenido Técnico
CN118773068A;	Univ Sw Sci & Tech Swust	China	New Rongchang pig-derived Lactobacillus reuteri used for inhibiting Escherichia coli, Staphylococcus aureus or Salmonella, preparation of acid-resistant and/or bile salt-resistant products and preparing medicine or feed additives for promoting intestinal development of piglets
	Live Pig Tech Innovation Center Chongqing		
CN118909860A;	The Spirit Jinyu Biological Pharmaceutical Co Ltd	China	Porcine contagious Actinobacillus pleuropneumoniae Outer membrane vesicles (OMVs) composition used in preparing porcine infectious pleuropneumonia vaccine comprises OMVs secreted by porcine contagious Actinobacillus pleuropneumoniae type 1 GZ strain and type 7 ZQ strain
CN118879558A;	The Spirit Jinyu Biological Pharmaceutical Co Ltd	China	Preparing Actinobacillus pleuropneumoniae outer membrane vesicles for preventing porcine infectious Actinobacillus pleuropneumoniae, by centrifuging Actinobacillus pleuropneumoniae type 1 GZ liquid, concentrating supernatant, adding polyethylene glycol, centrifuging, and re-suspending precipitates

Número de publicación	Solicitante	País de origen	Contenido Técnico
CN118755625A;	Guangxi Veterinary Res Inst	China	New Bacillus velezensis V1 strain used in inhibiting growth of <i>Salmonella choleraesuis</i> , <i>Staphylococcus aureus</i> and/or <i>Escherichia coli</i> , and in preparing fermented feed for preventing diarrhea of piglet, increasing daily weight of piglet and/or reducing weight ratio of piglet
	Univ Beibu Gulf		
CN118903401A;	Univ Henan Agricultural	China	Triple subunit vaccine of porcine epidemic diarrhea virus, porcine delta coronavirus and porcine transmissible gastroenteritis virus, comprises antigen and immune adjuvant, where antigen comprises pig epidemic diarrhea virus SCOE protein, and pig transmissible gastroenteritis virus SAD protein
CN118879547A;	Southwest Univ Of Science And Technology	China	New porcine <i>Bacillus subtilis</i> YB-X-721 used for inhibiting animal intestinal pathogens including <i>Escherichia coli</i> , <i>Salmonella</i> and <i>Staphylococcus aureus</i> and in preparation of acid-resistant and/or bile-resistant products
	Live Pig Tech Innovation Center Chongqing		
CN118726653A;	Univ South China Agricult	China	New marker cluster of differentiation 81 of porcine reproductive and respiratory syndrome in vitro sample, used in preparing reagent for preventing or treating porcine reproductive and respiratory syndrome, and in breeding pig variety for resisting porcine reproductive and respiratory syndrome
WO2024245971A1;	(Ceva) Ceva Sante Animale	France	Use of vaccine composition comprising live attenuated <i>Salmonella typhimurium</i> bacterium i.e. sole <i>Salmonella</i> active ingredient of vaccine composition e.g. for lessening severity of symptoms associated with <i>Salmonella choleraesuis</i> infection

Número de publicación	Solicitante	País de origen	Contenido Técnico
CN118812613A;	Shanghai Inst Of Materia Medica Chinese Academy Of Sciences	china	New 4'-fluorouridine compounds useful in preparing medicine for inhibiting viral replication and for preventing, alleviating and treating common cold, high-risk symptom infection, respiratory tract infection, pneumonia and its complications caused by respiratory syncytial virus
CN118845702A;	Sichuan Agricultural Univ	China	Nanomaterial used in preparation of medicine for treating or preventing virus infection, preferably avian influenza A virus, African swine fever virus, porcine epidemic diarrhea virus or typical swine fever virus infection, comprises baicalin wrapped and/or loaded by needle-shaped hydroxyapatite
WO2024228148A1;	Boehringer Ingelheim Vetmedica GmbH	Germany	Immunogenic composition used to induce immune response against porcine circovirus 2 comprises antigen composition comprising virus antigen, and gel composition
CN118955658A;	Univ South China Agricult	China	Preparing recombinant classical swine fever virus Npro protein by synthesizing codon-optimized classical swine fever virus Npro gene, inserting classical swine fever virus Npro gene into prokaryotic expression vector, transferring into Escherichia coli, inducing expression, purifying and renaturing
CN118894910A;	Univ South China Agricult	China	New PRRSV-GP3-GP5-M+PCV2-TBCap recombinant protein used for preparing porcine reproductive, respiratory syndrome and porcine circovirus type 2 bivalent vaccine
WO2024235714A1;	Intervet Int Bv	USA	Use of first vaccine comprising non-replicating Leptospira immunogen for treating pig against infection with Leptospira bacterium by injection of first vaccine into dermis of pig
	Intervet Inc	Netherlands	

Número de publicación	Solicitante	País de origen	Contenido Técnico
WO2024228149A2; WO2024228149A3;	Boehringer Ingelheim Vetmedica GmbH	Germany	Inducing immune response against porcine circovirus 2 (PCV2) in subject, and/or reducing clinical signs, viral load and/or viremia caused by PCV2 infection in subject, involves administering orally to subject immunogenic composition comprising non-replicating virus antigen
CN118879545A;	Yangzhou Univ	China	New non-pathogenic Escherichia coli strain, used for preparing vaccine or medicine for preventing or treating diarrhea in piglet, and preparing live vaccine for preventing F4+ enterotoxigenic Escherichia coli infection
WO2024235705A1;	Intervet Int Bv	China	Use of combination of first and second vaccine comprising non-replicating immunogen of Erysipelothrix rhusiopathiae, porcine parvo virus, and Leptospira bacterium for treating pig against infection with e.g. Erysipelothrix rhusiopathiae
	Intervet Inc		
WO2024205358A1;	(Care) Careside Co Ltd	South Korea	New vector comprising specific base pair sequence, used for producing porcine reproductive and respiratory syndrome virus (CSNA11-Lineage1 virus) used in vaccine composition for preventing or treating porcine reproductive and respiratory syndrome
US2024342167A1;	Univ Connecticut	USA	Treating porcine reproductive and respiratory syndrome, preferably comprising symptoms e.g. fever, lethargy, loss of appetite, vomiting, cough, sneezing, labored breathing, high blood pressure, low blood pressure, involves administering 2,3-dibenzylquinoxaline compound, or its salt to subject
	Atomwise Inc		

Número de publicación	Solicitante	País de origen	Contenido Técnico
CN118873530A;	Shenyang Weijia Biotechnology Co Ltd	China	Use of pharmaceutical composition comprising resveratrol and/or rinderine in preparing medicine for preventing or treating African swine fever, inhibiting wild-type African swine fever virus replication or inhibiting replication of gene deletion African swine fever virus
CN119015267A;	Cotton Res Inst Chinese Acad Agricultural Sci	China	Use of hemicylophenol, cottonopol or its derivative analogs in preparation of veterinary drugs for livestock and poultry, veterinary drugs for aquaculture, crop fungicides, crop virus control agents, and products for agricultural pest control
CN119162121A;	(Uyna)	China	New porcine reproductive and respiratory syndrome virus NADC30 weak strain used in preparation of porcine reproductive and respiratory syndrome vaccine and inducing to produce humoral immunity
CN118812668A;	Yangzhou Univ	China	New antigen epitope peptide of porcine reproductive and respiratory syndrome virus nucleocapsid protein is porcine nucleocapsid protein peptide segment, used in specific monoclonal antibody and preparing kit, medicine and reagent for detecting porcine reproductive and respiratory syndrome virus
CN118743710A;	Univ Shandong Agricultural	China	Use of PSI6206, GC376, silymarin, sophoridine, tomatine, or rosmarinic acid in prevention and treatment of porcine reproductive and respiratory syndrome virus, and porcine reproductive and respiratory syndrome

Número de publicación	Solicitante	País de origen	Contenido Técnico
CN119144526A;	(Cqaa)	China	New strain of porcine <i>Bacillus velezensis</i> YB-X-733, deposited in China General Microbiological Culture Collection Center, for use in preparation of probiotics, preparation of products for improving production performance of piglets, preparation of piglet feed, inhibiting harmful bacteria
CN119119248A;	(Ucag)	China	New single-domain antibody against African swine fever virus E165R protein comprising specific amino acid sequence, used for immunological detection of African swine fever virus, and preparing African swine fever virus immunological detection reagent
CN118846023A;	Shanghai Veterinary Res Institute Chinese Academy Of Agricultural Sciences China Center For Animal H	China	Porcine reproductive and respiratory syndrome virus (PRRSV) recombinant live vector vaccine useful for e.g. preparing medicine for treating PRRSV infection, expresses porcine interleukin 18 gene and classical swine fever virus E2 protein
CN118995642A;	Harbin Veterinary Res Institute Caas Harbin Branch Of China Animal Health And Epidemiology Center	China	Genetically engineered virus strain used for single use and combination with other immune preparations or medicines, comprises African swine fever virus vector strain as genetically engineered vector, where genome of strain contains expressible classical swine fever virus E2 protein gene
CN118806882A;	Wuhan Kejian Biological Co Ltd	China	New <i>Streptococcus suis</i> and swine erysipelas bигеминаль subunit vaccine comprising <i>Streptococcus suis</i> antigen protein amylase-binding protein B, AATS and swine erysipelas antigen protein surface protective antigen, used in preparing <i>Streptococcus suis</i> and/or swine erysipelas vaccine

Número de publicación	Solicitante	País de origen	Contenido Técnico
CN119119247A;	(Ucag)	China	New single-domain antibody with neutralizing activity against African swine fever virus E165R protein, which comprises specific amino acid sequence, used in immunological detection of African swine fever virus
CN119033924A;	Univ Jilin	China	New porcine contagious pleuropneumoniae subunit vaccine comprising transferrin-binding protein B-C (TbpB-C) protein and alcohol dehydrogenase E (AdHE) protein used in preparing medicine for preventing and treating porcine contagious pleuropneumoniae
CN118767120A;	Hangzhou Qixing Biotechnology Co Ltd	China	New African swine fever vaccine based on vesicular stomatitis virus vector prepared by selecting vaccine from replication-defective vesicular stomatitis virus vesicular stomatitis virus, carrying African swine fever virus, and providing multiple and strong immune protection for host
CN119144568A;	(Unaf)	China	New porcine reproductive and respiratory syndrome virus (PRRSV) used in preparing vaccine and medicine for preventing or treating porcine reproductive and respiratory syndrome caused by PRRSV NADC30-like strain
CN118852464A;	Huazhong Agricultural Univ	China	Fusion protein useful in preparation of vaccine for preventing porcine reproductive and respiratory syndrome, comprises Igk signal peptide connected to N-terminus of porcine reproductive and respiratory syndrome virus protein
JP2024140758A;	(Nhfo)	Japan	New bacteriophage, its original strain, or subcultured strain used in bacteriophage composition is preserved in National Institute of Technology and Evaluation, for inhibiting/controlling the growth and proliferation of F4-positive Escherichia coli, and treating or preventing Colibacillosis

Número de publicación	Solicitante	País de origen	Contenido Técnico
US2024325474A1;	Benjamin Daniel Denommee Dianne Lorchak David	USA	Medicinal composition used for preventing disease caused by viral pathogens, comprises organic liquid extract derived from <i>Laminaria japonica</i> or <i>Andrographis paniculata</i> , antifoaming agent, antimicrobial, anti-inflammatory agent, anti-aging agent, antiseptic agent, plant-derived oil, thickening agent
WO2024248452A1;	Choongang Vaccine Laboratories Co Ltd Cavac Republic Of Korea Ministry Of Envirement Nat Institute Of Wildlife Disease Control And Prevention Iac In Nat Univ Chungnam Genkore Inc Avinext Co Ltd	South Korea	New attenuated African swine fever virus ASFV-KOR.INJE.MEC-01.2022 obtained by sub-culturing African swine fever virus in cell line derived from rhesus monkey kidney cells, used in vaccine composition for preventing African swine fever in Suidae animal and for detecting African swine fever virus
CN118878646A;	Jilin Univ	China	New atypical swine fever virus antigen fragment of DP238L protein useful in reagent for diagnosing African swine fever virus infection or product for preventing and treating African swine fever virus infection
WO2024248170A1;	Choongang Vaccine Laboratories Co Ltd Cavac	South Korea	New CA-CAS-01-A cell line deposited capable of proliferating African swine fever virus used for mass producing and preventing African swine fever virus
CN119040277A;	Univ Jinan	China	New <i>Escherichia coli</i> bacteriophage GaoH6-13E used in preparation of drug for treating diseases caused by <i>Salmonella</i> and/or <i>Escherichia coli</i> , in bactericidal composition for preventing and controlling <i>Salmonella</i> and <i>Escherichia coli</i> and in livestock and poultry breeding

Número de publicación	Solicitante	País de origen	Contenido Técnico
CN118955651A;	Univ Zhengzhou	China	New antigenic epitope of African swine fever virus pH108R protein used in preparing monoclonal antibody against African swine fever virus pH108R protein for preparing medicine for inhibiting and/or neutralizing pH108R protein of African swine fever virus
	Longhu Modern Immunology Laboratory		
CN119019549A;	Lanzhou Veterinary Res Institute Chinese Academy Of Agricultural Sciences China Center For Animal He	China	New anti-pig delta coronavirus neutralizing active nano antibody comprising Nb1, Nb3 or Nb8 used in preparing pig delta coronavirus detecting reagent or reagent box, and in preparing medicine for preventing or treating infection of pig delta coronavirus, where medicine is oral medicine
CN118852420A;	(Unea) Northeast Agricultural Univ	China	New porcine delta coronavirus neutralizing monoclonal antibody comprising heavy chain variable region and light chain variable region with specific amino acid sequences respectively, used in preparing medicines for treating pig delta coronavirus, and reagent for detecting porcine delta coronavirus
CN119020260A;	(Cags)	China	New suspension Chinese hamster ovary cell line useful for stably expressing classical swine fever virus E2 protein and preparing classical swine fever vaccine for controlling and eradicating classical swine fever
CN118878645A;	(Uyhr) Henan Agricultural Univ	China	New epitope related to K205R protein of African swine fever virus comprising antigenic epitopes aa160-170 and aa176-183 having specific amino acid sequences, used for establishing African swine fever virus serological detection method and preventing and controlling African swine fever virus

Número de publicación	Solicitante	País de origen	Contenido Técnico
CN118725144A;	Dongwo Tongtai Feng-heng Biological Eng Co Ltd	China	New African swine fever tandem epitope recombinant protein, which comprises epitope peptides in G1211R protein, CP2475L protein, CP204L protein, CP530R protein, D339L protein, D1133L protein, D345L protein, P1192R protein, and H359L, used for preventing African swine fever virus
CN118772294A;	Dongwo Tongtai Feng-heng Biological Eng Co Ltd	China	T cell epitope series antigen used in preparing African swine fever virus vaccine and product for preventing African swine fever virus, comprises two epitope peptides of QP383R protein, S183L protein, A151R protein, A224L protein, D205R protein and E184L protein
CN118766918A;	Inst Microbiology Cas	China	Use of amide based compound or pharmaceutically acceptable salt thereof is useful in preparation of drug for preventing and treating African swine fever virus infection
CN118987188A;	Beijing Hemu Biological Tech Co Ltd	China	New mRNA vaccine comprising 5' untranslated region, signal peptide sequence, RNA gene sequence encoding catabolite activator protein of porcine circovirus, and 3' untranslated region and polyadenylic acid, used in preparing, preventing and treating porcine circovirus disease
CN118931800A;	Shandong Hongqi Bio-technology Co Ltd	China	New <i>Bacillus subtilis</i> useful for preparing antibacterial product for e.g. <i>Escherichia coli</i> or <i>Clostridium perfringens</i> , as additive in feed for livestock breeding, and for inhibiting intestinal inflammation and promoting animal digestion

Número de publicación	Solicitante	País de origen	Contenido Técnico
CN118909856A;	Univ Nanjing Agricultural	China	New Lactiplantibacillus plantarum 6-14 used for resisting multiple drug-resistant bacteria, in preparing probiotics preparation and in preparing microbial preparation with antibacterial effect by inhibiting drug-resistant bacteria and/or non-drug-resistant bacteria
CN118806760A;	(Uscg) South China Agricultural Univ	China	Use of Lomitapide for preparing medicine for preventing African swine fever virus infection
WO2024235366A1;	(Cigb) Ct Ingenieria Genetica Biotecnologia	Cuba	Oral immunogenic formulation used for inducing an immune response against classical swine fever virus, comprises immunologically relevant chimeric antigen of pathogenic microorganism of pigs fused to CD154 molecule of pigs, and excipient for oral immunization
CN118754995A;	(Dong) Dongwo Tongtai Fengcheng Biological Eng Co Ltd	China	New African swine fever T cell epitope recombinant antigen comprising epitope peptides in e.g. K145R protein, K205R protein and multigene family (MGF)-110-1L protein which are connected by connecting arm, used for in vaccine preventing African swine fever virus
CN118930640A;	Univ Huazhong Agricultural	China	New monoclonal antibody 20D5 against African swine fever virus P150 protein used in preparation of detection product for African swine fever virus or its P150 protein
WO2024235368A1;	(Cigb) Ct Ingenieria Genetica Biotecnologia	Cuba	New chimeric antigen comprising specific amino acid sequence, used in manufacturing medicament for protecting pigs against infection by different genotypes of African swine fever virus (ASFV), stimulating humoral and cellular response against ASFV, and preventing disease such as African swine fever

Número de publicación	Solicitante	País de origen	Contenido Técnico
CN118766896A;	(Uyna) Univ Nanjing Agricultural	China	Use of milbemycin oxime in preparation medicine for resisting African swine fever virus
CN118766946A;	(Uyna) Univ Nanjing Agricultural	China	Azithromycin, its hydrate, or its salt in preparation of anti-African swine fever virus drugs
CN118726435A;	(Chan) Changsha Lvy Biotechnology Co Ltd	China	New double-promoter recombinant carrier for expressing African swine fever virus immunogenic protein comprises original carrier and recombinant gene, where recombinant gene is located downstream of promoter in original carrier, used for preventing African swine fever infection
CN119119246A;	(Cags)	China	New nanoantibody KR-6 resisting African swine fever virus K205R protein and comprising specific amino acid sequence used in preparing detection reagent or kit for diagnosis, prevention or treatment of African swine fever
CN119040274A;	Univ Heilongjiang Bayi Agricultural	China	New Salmonella phage vB_Salm-ps4 used for preparing preparation for inhibiting and/or removing Salmonella and preparing preparation for inhibiting and/or removing Escherichia coli, where preparation includes preparation for targeting Salmonella polysaccharides and/or removing Salmonella biofilm
CN118806875A;	(Uysd) Shandong Agricultural Univ	China	Use of coronin 1C protein comprising specific amino acid sequence in preparing blocking agent for inhibiting porcine reproductive and respiratory syndrome virus infection or preparing medicine for preventing and treating porcine reproductive and respiratory syndrome

Número de publicación	Solicitante	País de origen	Contenido Técnico
CN119139464A;	(Cags)	China	New recombinant African swine fever attenuated vaccine comprising p54 protein with apoptosis-promoting motif deletion for preventing African swine fever
CN118909135A;	Qingdao Mingqin Tech Co Ltd	China	New fusion protein useful in bivalent vaccine composition for preventing African swine fever
CN118878647A;	(Uyji) Chongqing Research Institute Of Jilin Univ	China	New African swine fever virus EP1242L protein antigenic epitope peptide comprising specific comprises amino acid sequence, used in isolated antigen-antibody complex, vaccine and indirect ELISA detection kit for African swine fever virus antibodies
CN118909962A;	(Cags)	China	Hybridoma cell useful in preparation for identifying, detecting/identifying African swine fever virus P72 protein, African swine fever virus sub-viral particles containing African swine fever virus P72 protein/African swine fever virus particles
CN118949027A;	(Zjmd)	China	Use of surface protein antigen A (SpaA) protein as immunopotentiator in preparing vaccine for preventing viral subunit, where SpaA protein is Erysipelothrix rhusiopathiae SpaA protein, and viral subunit vaccine is viral subunit protein composition
CN118852415A;	Lanzhou Veterinary Res Institute Chinese Academy Of Agricultural Sciences China Center For Animal He	China	New nanobody KR-1 aiming at African swine fever virus K205R protein comprising specific amino acid sequence used, in preparing African swine fever virus detection reagent or kit

Número de publicación	Solicitante	País de origen	Contenido Técnico
CN118845854A;	(Uysd) Shandong Agricultural Univ	China	Use of probiotic metabolites for preventing and treating porcine reproductive and respiratory syndrome virus, where probiotic metabolites are Lactobacillus reuteri metabolites, Lactobacillus plantarum metabolites, Lactococcus gasseri metabolites and/or Lactococcus lactis metabolites
CN119015423A;	(Chve)	China	Use of diphenylbutyric acid in preparation of medicine or preparation for preventing or treating African swine fever
CN118955650A;	(Gpro)	China	Porcine circovirus type 2/type 3 virus-like particle comprises porcine circovirus type 2 virus-like particles including porcine circovirus type 2 Cap protein and porcine circovirus type 3 virus-like particles including porcine circovirus type 3 Cap protein
CN118853524A;	(Unea) Northeast Agricultural Univ	China	New recombinant porcine Lactobacillus casei co-expressing porcine beta-defensin 2 and porcine epidemic diarrhea virus S1 protein useful in preparing a medicine e.g. an oral mucosal vaccine for preventing or treating diseases caused by PEDV, <i>Salmonella typhi</i> or both infections
CN118903116A;	(Uysy)	China	Application of lysophosphatidic acid inhibitor for preparing medicine for inhibiting porcine reproductive and respiratory syndrome virus replication and relieving clinical symptoms, preferably high fever and cough
CN118909961A;	(Cags)	China	New hybridoma cell comprising hybridoma cell with microbial deposit number of (CCTCC NO: C2024209) or its passage cell of hybridoma cell useful in e.g. composition for identification, detection or identification of African swine fever virus P72 protein

Número de publicación	Solicitante	País de origen	Contenido Técnico
CN118787650A;	Lanzhou Veterinary Res Institute Chinese Academy Of Agricultural Sciences China Center For Animal He	China	Use of 2-(4-((3R,5S)-3,5-dimethylpiperazine-1-yl)-4-methyl-1-pyridin-3-yl)phenyl)-7-methyl-3,7-dihydro-4H-pyrrolo(2,3-d)pyrimidin-4-one (I) (AZ6102) or its salt for treating African swine fever virus infection, and agent for inhibiting expression of African swine fever virus P72 gene/protein
CN118895228A;	Spirit Jinyu Biological Pharmaceutical Co Ltd	China	Preparation of porcine contagious pleuropneumonia Actinobacillus outer membrane vesicle, comprises fermenting and culturing Actinobacillus 7-type ZQ strain, centrifuging, concentrating, adding polyethylene glycol, stirring, centrifuging, removing supernatant, resuspending precipitate and filtering
CN118852461A;	China Agricultural Univ	China	Ferritin nanoparticle displaying African swine fever virus (ASFV) protein B cell epitope used in diagnosis and prevention of ASFV and in basic medical and biological research, comprises monomeric ferritin subunit and B cell epitope sequence
CN118806884A;	Hebei Normal Univ Of Science And Technology	China	Small activating RNA (saRNA) vaccine of porcine reproductive and respiratory syndrome virus glycoprotein V gene used in coating antigen for detecting immune effect of saRNA vaccine, is constructed by inserting nucleic acid segment of coding GP5 protein into expression vector of saRNA vaccine
CN118910049A;	(Uhza)	China	New guide RNA comprising specific nucleotide sequence used in identifying function of pig C16orf62 gene, in preparing drugs or cell models against pig delta coronavirus infection or in preparing medicine for inhibiting pig delta coronavirus proliferation

Número de publicación	Solicitante	País de origen	Contenido Técnico
CN118726483A;	Chuke Biological Eng Co Ltd	China	Constructing transmissible porcine gastro-enteritis virus S protein expression vector by e.g. inserting secretion signal peptide sequence in N segment, adding histidine tag at C-terminus, synthesizing and inserting between EcoRI and HindIII restriction sites
CN118879642A;	(Cags) Lanzhou Univ; (Ulan) Lanzhou Veterinary Res Institute Chinese Academy Of Agriculture Sciences	China	New recombinant porcine reproductive and respiratory syndrome virus useful in preparing PRRSV diagnostic reagent or PRRSV vaccine, obtained by replacing NSP2 gene sequence of the HPPRRSV GD strain and replacing ORF5-7 and 3'UTR gene fragments
CN118787651A;	(Uyna) Nanjing Agricultural Univ	China	Use of 5,13-dihydro-4,5,13-trimethyl-2-[[1-(4-piperidinyl)-1H-pyrazol-4-yl]amino]-6H-naphtho[2,3-e]pyrimido[5,4-b][1,4]diazepin-6-one (HTH-01-015) compound or its salt in preparation of medicine for preventing African swine fever virus infection
CN118956905A;	(Uscg)	China	New avian porcine circovirus type 2 gene comprising specific base pair sequence, used for preparing product for detecting porcine circovirus type 2 (PCV2) and preparing PCV2 vaccine
CN118962126A;	China Animal Husbandry Ind Co Ltd	China	Enzyme-linked immunoassay kit in specific quantitative detection of porcine reproductive and respiratory syndrome virus antigen, and preparing kit for detecting virus antigen, comprises enzyme-linked reaction plate and enzyme-labeled antibody coated by monoclonal antibody

Número de publicación	Solicitante	País de origen	Contenido Técnico
WO2024242263A1;	Univ Industry Cooperation Group Kyung Hee Univ	South Korea	Pharmaceutical, food or feed composition useful preventing, improving or treating aryl hydrocarbon receptor-mediated disease, comprises 2-(((1-(2-(1H-indol-3-yl)ethyl)-1H-1,2,3-triazol-4-yl)methyl)amino)-1,4-dihydronaphthalene-1,4-dione, or its salt
	Univ Nat Hanbat Ind Acad Coop Found		
CN118994418A;	Chuke Biological Eng Co Ltd	China	New porcine delta coronavirus S protein having following characteristics of based on S protein sequence of porcine delta coronavirus SC strain, secretion signal peptide sequence inserted into N segment, used as vaccine for preventing and controlling porcine delta coronavirus
CN119080921A;	(Usnd)	China	New pig-mouse chimeric antibody for resisting pig delta coronavirus comprising heavy chain and light chain useful in preparing medicine for preventing and treating pig delta coronavirus infection
CN118909963A;	Harbin Veterinary Res Institute Caas Harbin Branch Of China Animal Health And Epidemiology Center	China	New hybridoma cell useful for preparing preparation for identifying, detecting or identifying African swine fever virus P72 protein, which is first hybridoma cell, second hybridoma cell or first hybridoma cell and second hybridoma cell
CN119119212A;	(Jian)	China	New pig rotavirus VP4 truncated protein comprising its amino acid sequence, used in preparing medicine in form of injection or oral dosage for treating or preventing porcine rotavirus infection disease

Número de publicación	Solicitante	País de origen	Contenido Técnico
CN119055762A;	(Mili)	China	New porcine reproductive and respiratory syndrome virus (PRRSV) recombinant Newcastle disease virus vector vaccine comprising HPPRRSV YN-LQ strain and NADC30-like SD-A19 strain, used in preparing vaccine
CN118791578A; CN118791578BB;	(Cags) Shanghai Veterinary Res Institute Chinese Academy Of Agricultural Sciences China Center For Animal H	China	New antigenic epitope of non-structural protein 12 protein in non-structural protein encoded by porcine reproductive and respiratory syndrome virus (PRRSV), comprising specific amino acid sequences, used in preparing kit for detecting PRRSV infection or medicine for treating PRRSV infection
CN119019544A;	Univ Zhejiang Science & Tech	China	New anti-porcine circovirus type 3 (PCV3) capsid protein monoclonal antibody comprising monoclonal antibody 1D4-10-16 and monoclonal antibody 2B6-1-1 used in preparing PCV3 or PCV3Cap protein detection reagent
	Zhejiang Hongsheng Biotechnology Co Ltd		
CN118858654A;	Inst Of Military Veterinary Medicine Academy Of Military Sciences	China	Application of ribosomal protein L34 (RPL34) as biomarker of porcine delta coronavirus, where application method is performed by using overexpressed RPL34 protein as biomarker of porcine delta coronavirus infection in body
CN118725054A;	Shanghai Veterinary Res Inst Chinese Academy Agricultural Sciences China Ct Animal	China	Antigen fragment of broad-spectrum anti-porcine epidemic diarrhea virus used in preparing porcine epidemic diarrhea virus self-replicating mRNA vaccine and medicine for treating or preventing diseases caused by porcine epidemic diarrhea virus infection, is optimized by codon

Número de publicación	Solicitante	País de origen	Contenido Técnico
WO2024235285A1; CN118994329A;	Beijing Westar Biosciences Co Ltd	China	New mutant respiratory syncytial virus (RSV) F protein comprising amino acid mutation, which stabilizes recombinant RSVF protein in pre-fusion conformation useful in preparing vaccine or medicine for treating RSV infection-related diseases
WO2024233996A2;	Wistar Inst	USA	New nucleic acid molecule comprising specified nucleotide sequence encoding synthetic African swine fever virus (ASFV) antigen used e.g. for treating or preventing ASFV associated pathology
CN118986958A;	(Unsm)	China	Use of brazilin in preparing medicine for resisting, preventing and/or treating swine acute diarrhea syndrome coronavirus (SADS-CoV) and inhibitor of SADS-CoV main protease, and inhibiting replication, growth or reproduction, transcription and assembly of SADS-CoV
CN118976015A;	(Ucag)	china	Composition useful for preparing bacteriostatic agent or antibacterial medicine and preparing medicine for preventing and treating intracellular bacterial infection in livestock and poultry caused by e.g. Mycobacterium tuberculosis, comprises emodin and rhein
CN118812666A;	Longhu Modern Immunology Laboratory Zhengzhou Univ	China	New polypeptide of AS-FVp11.5 protein B cell epitope for use in preparation of reagent for diagnosis, detection or prevention of African swine fever virus
CN119015404A;	(Uxjm)	China	New Brucella recombinant multivalent epitope vaccine useful for e.g. preparing medicine for preventing and treating brucellosis, contains linear B cell epitope and linked conformational B cell epitope

Número de publicación	Solicitante	País de origen	Contenido Técnico
WO2024249554A1;	The Charlotte Mecklenburg Hospital Authority D/B/A Atrium Health	USA	New carboxamide-based compound used in composition for treating cancer e.g. lymphoma, leukemia, melanoma, blastoma, sarcoma, myeloma, glioma, germ cell tumor and adrenal cancer, and disease such as non-cancer proliferative disease, autoimmune disease, infection, and inflammatory disease in subject
WO2024226643A1;	Int N&H Denmark ApS	Denmark	Animal diet useful for improving animal performance on metric e.g. increased feed efficiency and improved nitrogen retention, and reducing pathogenic bacteria populations in animal, comprises engineered phytase polypeptide
	Danisco Us Inc	USA	
CN118726176A;	Henan Delin Biological Product Co Ltd	China	Composite probiotics used in preparing fermented feed for improving reproductive performance of later pregnancy and lactation period of pig by reducing dead rate of pigs, and improving production activity rate, comprises Lactobacillus casei, Lactococcus lactis and Saccharomyces cerevisiae
	Univ Henan Agricultural		
CN118909057A;	(Uyyz)	China	New advanced B cell antigenic epitope of the S protein receptor-binding domain (RBD) of porcine epidemic diarrhea virus (PEDV) useful in preparing antibody against F4 and/or F18 pili or preparing multi-linked multivalent vaccine
CN118813550A;	Harbin Veterinary Res Institute Caas Harbin Branch Of China Animal Health And Epidemiology Center	China	New hybridoma cell or its subculture cell useful for preparing formulation for detecting or identifying African swine fever virus (ASFV) P22 protein, ASFV subviral particles containing ASFV P22 protein, or ASFV particles
CN118995500A;	(Bioa)	China	New marine-derived <i>Bacillus velezensis</i> strain RS3-13 useful in synthesis of amylase, cellulase, chitinase, and beta-glucanase

Número de publicación	Solicitante	País de origen	Contenido Técnico
CN118954577A;	(Jaah)	China	Preparing nano gallium oxide particles useful in bacteriostatic, comprises mixing extract of <i>Scindapsus</i> ground coat plant with gallium salt solution, and burning reaction product at high temperature
CN118878668A;	Shanghai Veterinary Res Institute Chinese Academy Of Agricultural Sciences China Center For Animal H	China	New monoclonal antibody porcine epidemic diarrhea virus (PEDV) SHNA that specifically recognizes PEDV nsp12 protein, comprising heavy chain variable region and light chain variable region comprising specific amino acid sequence
CN119020204A;	(Ucag)	China	New <i>Bacillus coagulans</i> BCHO used in preparation of antibacterial biological products, preferably gram-positive pathogens including <i>Staphylococcus aureus</i> , <i>Listeria monocytogenes</i> , and <i>Clostridium perfringens</i> , and as feed additive for improving intestinal flora of animals
CN118853726A;	Yangtze Univ	China	Recombinant expression cassette used for preventing and treating diseases caused by <i>Escherichia coli</i> , comprises upstream homologous arm sequence amyEUp, magainin 2 coding region sequence mag2, downstream homologous arm sequence amyEDown and retaining coding region signal peptide sequence
CN118903154A;	(Cags)	China	Use of (4aR,6aS,6aR,6bR,8aS,12aS,14bS)-8a-(imidazole-1-carbo) preparing medicine for preventing foot-and-mouth disease virus infection
WO2024213098A1;	Beijing Jitai Pharmaceutical Tech Co Ltd Hangzhou Jitai Pharmaceutical Tech Co Ltd	China	Lipid nanoparticle useful in medicine composition for treating spleen disease or spleen-related disease including blood system disease, infectious disease, immune disease, or cancer, comprises ionizable lipid and steroid compound

Zooepidemicus SzM protein porcine monoclonal antibody used for preventing and/or treating disease caused by Streptococcus zooepidemicus infection, comprises heavy chain variable region and light chain variable region comprising specific amino acid sequences
WO2024213728A1;	Univ Of Iceland	Iceland	Use of composition comprising compound including entacapone and pozotinib to treat disease/condition e.g. neonatal asphyxia, cerebral haemorrhage, subarachnoid haemorrhage, subdural hematoma, cerebral infarction and cerebral vasospasm
	Landspitali Univ Hospital		
WO2024235285A1; CN118994329A;	Beijing Westar Biosciences Co Ltd	China	New mutant respiratory syncytial virus (RSV) F protein comprising amino acid mutation, which stabilizes recombinant RSVF protein in pre-fusion conformation useful in preparing vaccine or medicine for treating RSV infection-related diseases

Número de publicación	Solicitante	País de origen	Contenido Técnico
WO2024233577A1;	Vetstem Inc	USA	Platelet-rich plasma composition useful for treating disease, disorder, condition e.g. restenosis, cancer, diabetic retinopathy, rheumatoid arthritis and psoriasis, comprises primed platelets
CN118773056A;	Shandong Binzhou Animal Science & Veterinary Medicine Acad	China	New <i>Salmonella abortus</i> , where the preservation number is CGMCC No. 31065, used as <i>Salmonella</i> inactivated vaccine adjuvant; and preventing abortion of pregnant equine female livestock caused by pathogenic bacteria
WO2024231530A1; EP4461367A1;	Centre Nat Rech Scient	France	New ternatin-type cyclopeptide compound used in pharmaceutical composition for preparing medicament and in therapy for preventing and/or treating cancer and virus infections
	Inst Nat Sante Rech Med		
	Institut De Rech Pour Developpement		
	Univ De La Reunion	Gabon	
WO2024227074A1;	Kriya Therapeutics Inc	USA	New expression cassette useful in pharmaceutical composition or kit for e.g. regulating expression of protein in mammalian cell, expressing protein in subject, and treating disease in mammal, contains promoter, upstream exon, and upstream intron
WO2024249554A1;	The Charlotte Mecklenburg Hospital Authority D/B/A Atrium Health	USA	New carboxamide-based compound used in composition for treating cancer e.g. lymphoma, leukemia, melanoma, blastoma, sarcoma, myeloma, glioma, germ cell tumor and adrenal cancer, and disease such as non-cancer proliferative disease, autoimmune disease, infection, and inflammatory disease in subject
WO2024245411A1; CN119060965A;	(Cans) Cansino Biologics Inc	China	New recombinant adenovirus e.g. in preparing medicine for gene therapy, comprises negatively charged amino acids in hypervariable region of hexon protein of adenovirus mutated into neutral amino acids and positively charged amino acids

'La Inteligencia Artificial y las Patentes', riesgos y oportunidades

La aparición de una tecnología diseñada para realizar tareas que normalmente requieren de la inteligencia humana ofrece oportunidades enormes para mejorar la eficiencia de los métodos y dinámicas de trabajo. No obstante, una tecnología capaz de imitar las facultades cognitivas humanas, entraña también riesgos e interrogantes que han de ser analizados y resueltos.

INDICADORES PARA PYMES 2024			
TIPO DE PI	TAÍAS CON ACTIVIDADES INCLUIDAS	COSTE/URADA	% DE RE
IP Bienes	IP Símbolos en los países de las oficinas participantes. IP Díces Entidades de Terceros en materia de cumplimiento de las obligaciones de la OEPM.	A escala nacional	9
Marcas y diseños	Protección de marcas y diseños. Tasas de solicitud clase: examen, registro, publicación y protección.	A escala nacional, regional y de la UE	7
Patentes	Protocolo de marcas y diseños en el sistema de Madrid y la Haya. Tasa de presentación, búsqueda y examen, concessión, publicación. Costes para las solicitudes con procedimientos prioritarios.	A escala internacional	5
Otros	Protección de la variedad vegetal. Presentación y examen, concessión, publicación. Costes para las variedades vegetales con procedimientos prioritarios.	A escala europea	7
Costes adicionales para las patentes europeas y las demás entidades de la UE.			

Miles de empresas se han beneficiado en toda la UE de las ayudas del SME Fund para la protección de la Propiedad Industrial

En la era digital, la protección de la Propiedad Industrial (PI) es una necesidad, sobre todo para las pequeñas y medianas empresas. El SME Fund nació en 2022 con el propósito de prestar apoyo financiero a las pymes de la Unión Europea (UE) en la protección de sus derechos de Propiedad Intelectual e Industrial.

La revista Economía Industrial dedica un monográfico a la OEPM por su 200 aniversario

Han pasado dos siglos desde la creación del Real Conservatorio de Artes en 1824. Esta institución es la antecesora directa de la actual Oficina Española de Patentes y Marcas (OEPM) que, a lo largo de la historia y bajo distintas denominaciones, ha sido la encargada de proteger los derechos de Propiedad Industrial en España.
